

# Be one with Swedish nature – off-grid at Myssjö Farm

Immerse yourself in Sweden's nature for a day at the vegis family's Myssjö Farm, just 50 minutes from Stockholm Central Station. A unique day filled with adventure, tranquility, and connection with nature awaits you!

## Sustainable arrival and warm hospitality

Your hosts Sandra and Mattias, will greet you at the mainland and transport you raft powered by a solar-charged electric motor. Once on the island, you'll enjoy a guided tour of the farm, learning firsthand about off-grid living and sustainable farming practices.

## Eco-friendly and cultural delights

Our silent electric rafts allows you to fully appreciate the sounds of nature. For a refreshing break, take a swim from the rafts bathing ladder. As a special treat, enjoy a taste of Sweden's famous fika (coffee and sweet pastries) while gliding across the serene waters.

## Authentic outdoor experiences

Lunch will be served near the water, freshly prepared over open fire using seasonal ingredients. You'll then have freetime to explore the island at your leisure - swim in the lake, relax in the sauna, or take a peaceful stroll through the forest.

## Accessible and inclusive adventure

The day concludes with a guided raft tour on Lake Yngern, one of Sweden's cleanest lakes. The tour is suitable for everybody, including guests with canes, walkers, or strollers. Marvel at the natural beauty and silence of the area, and if luck is on your side, spot local wildlife such as beavers, sea eagles, or even the elusive wolf, moose or elk.

Each guided tour becomes unique, depending on what we get to see, hear and experience on the journey.
